Visual Braille is provided on this flip chart to assist people who don't read Braille. After printing, Braille stickers will need to be added for the flip chart to be used properly. It may also be appropriate to add a piece of male velcro at the bottom left hand side to support the student to find where to start.

On the menu page, the Braille for the menu items is provided as Uncontracted (Grade 1) Braille - spelled letter-by-letter. The word "space" is also represented by letter-by-letter spelling, but in Braille it is usually represented as a gap, just as it is in other print.

On the next page, you will find the menu.  
This is designed to be positioned below the letters and always available. Please see images below for more information.
